CORN-HOG ADJUSTMENT PLAN

In accepting the Government's offer under the Corn-Hog Adjustment Plan, you agree to the following:

1. Reduce the acreage planted to corn on the farm you will operate in 1934 to at least 20 per cent below the average number of acres planted to corn on this farm during the past two years (1932 and 1933.)

2. (a) Reduce the size of your brood-sow herd so that not more than three fourths as many litters will be farrowed in 1934 as were farrowed on the average by your sows in 1932 and 1933.

(b) Market from these litters not more than three fourths of the average number of pigs farrowed and marketed (or to be marketed this winter) from your own sows in 1932 and 1933. You also agree not to increase in 1934 the number of hogs bought and fed for market, above the average number bought and fed during the 2-year base period.

For making these adjustments, you receive the following benefits:

1. A corn-reduction payment at the rate of 30 cents per bushel on the estimated production of corn, in the past five years, on the contract acreage. The 2-year base period, 1932 and 1933,

will determine the number of acres you may contract to the Government. If, for example, you contracted 20 acres of land which yielded, or would have yielded in the past 5 years, an average of 30 bushels per acre, you would receive \$9 per acre or a total of \$180. (20 acres x 30 bushels x 30 cents.) One half, or 15 cents per bushel of this corn reduction payment will be made as soon as possible after acceptance of your contract by the Secretary of Agriculture. The remainder, minus local administrative expenses, will be paid on or after November 15, 1934, upon evidence that the contract has been fulfilled.

The abandoned acreage under this plan, may be planted to legumes, permanent pasture, green manure crop for plowing under, or summer fallowed, but under no conditions can it be pastured by work stock or any other stock, nor can a crop be taken from it.

This offers a splendid chance for developing permanent pasture, and we offer a suitable mixture below.

Pasture Mixture \$4.50 per 100 lbs.

Well balanced mixtures adapted to this climate. Ky. Blue Grass, Orchard Grass, Meadow Fescue, Timothy and Clover. Sow 25 to 30 lbs. per acre.

GARDEN SEEDS
